## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Domash et al. (US Pub 2003/0072009).

In regards to claim 1, Domash discloses an optical spectrum monitoring system (fig. 2) comprising a tunable filter that filters an optical signal (fig. 2, 101), a signal detector that detects a filtered optical signal from the tunable filter (fig. 2, 204), a logarithmic amplifier that amplifies the output of the signal detector (fig. 2, 206), an analog to digital converter for converting the output of the logarithmic amplifier spectrum into sample data (fig. 2, 203), and a data processing subsystem that analyzes the sample data (fig. 2, 208).

In regards to claim 2, the optical spectrum monitoring system further comprises a package (fig. 22, 2306), an optical bench installed within the package, the filter and the detector being connected to the optical bench (fig. 22, substrate, 2303 and 2304), temperature detector for detecting a temperature within the package (fig. 22, 2301), and a thermoelectric cooler for controlling a temperature of the package (fig. 22, 2302).

In regards to claim 3, the amplifier is installed within the package (fig. 22, AMP).

In regards to claim 4, the amplifier is installed on the optical bench (fig. 22, SUBSTRATE).

***Conclusion***

If a copy of a provisional application listed on the bottom portion of the accompanying Notice of References Cited (PTO-892) form is not included with this Office action and the PTO-892 has been annotated to indicate that the copy was not readily available, it is because the copy could not be readily obtained when the Office action was mailed. Should applicant desire a copy of such a provisional application, applicant should promptly request the copy from the Office of Public Records (OPR) in accordance with 37 CFR 1.14(a)(1)(iv), paying the required fee under 37 CFR 1.19(b)(1). If a copy is ordered from OPR, the shortened statutory period for reply to this Office action will not be reset under MPEP § 710.06 unless applicant can demonstrate a substantial delay by the Office in fulfilling the order for the copy of the provisional application. Where the applicant has been notified on the PTO-892 that a copy of the provisional application is not readily available, the provision of MPEP § 707.05(a) that a copy of the cited reference will be automatically furnished without charge does not apply.
